TITLE: Sheath-core type conjugate polyester
fibre - with sheath consisting of polyethylene
terephthalate copolymerised with sulpho-isophthalate deriv.

PATENT-ASSIGNEE: TORAY IND INC [TORA]

PRIORITY-DATA: 1985JP-0101428 (May 15, 1985)

*Sheath - diff to dye
core - easily dyable (PET-
cationic
dye)*

ABSTRACTED-PUB-NO: JP 61266617A

BASIC-ABSTRACT:

The conjugate fibre has a sheath consisting of polyester that is difficult to dye with cationic dye and a core consisting of a polyester modified with comonomer which has an affinity for cationic dye. In the cross section at right angle to axis of fibre, ratio of cross sectional area of sheath component to total cross sectional area of the fibre is 0.05 to 0.30. The comonomer is a cpd. of formula (I) and is used in 1.0 to 10.0 mol.%, where

M is alkali metal;
A and A' are -CH₃ or -(CH₂)_nOH; n is at least 2. (I) are
e.g.
dimethyl(5-sodium sulpho) isophthalate and
bis-2-hydroxyethyl (5-sodium
sulpho)isophthalate. The polyester for sheath consists
mainly of polyethylene
terephthalate and may contain less than 20% of comonomer.

ADVANTAGE - The conjugate polyester fibre produces woven
and knitted fabrics
which can be decorated with high quality coloured patterns
by dip dyeing
through control of alkali treatment.
